## **WinCCGURU's Complete Programming Course for WinCC SCADA Engineers**

Section 1 Class Resources: Install SSMS

Notes:

1. If you already have a version of SQL Server Management Studio installed, you can skip this step.
2. You can use this link to download SSMS version 19.3: <https://learn.microsoft.com/en-us/sql/ssms/download-sql-server-management-studio-ssms>
3. Or you can search for the latest SSMS Version and download that version. Just be sure you are downloading from a Microsoft site, and not a 3<sup>rd</sup> party!
4. Install SSMS and open it as shown in the video.
