

Reordering Algorithms Exercises

reverse()

- Describe the reverse algorithm function
- What arguments does reverse() take?
- Write a simple program that uses reverse()
- Write the equivalent code without using reverse()

rotate()

- Describe the rotate algorithm function
- What arguments does rotate() take?
- What is the return value from rotate()?
- Write a simple program that uses rotate()

rotate_copy()

- Describe the rotate_copy algorithm function
- What arguments does rotate_copy() take?
- What is the return value from rotate_copy()?
- Write a simple program that uses rotate_copy()
